

EASY GARAGE CLEANING

Lead System Standard Operating Procedure

Simple. Three tools. One goal — book the job.

Version 2.2 · May 2026

For Tyler & future EGC employees

Confidential

The Simple Version

EGC uses three tools to manage leads from first contact to booked job:

Quo (970-999-1818)

EGC's SMS and call line. All customer texts come from and go to this number. Tyler uses Quo to talk to leads.

Employee Portal

easygaragecleaning.com/employee — Tyler updates lead status here. BOOKED, LOST, or pause automation. Also where he marks jobs complete.

Automation (runs in the background)

When a new lead arrives, the system instantly texts the customer a greeting from Tyler AND notifies Tyler. When a job is marked complete, the system sends a review request automatically. The system also feeds lead-quality signals back to Meta so the ads get smarter.

How a Lead Enters the System

- 1 Customer fills out an EGC Facebook ad form (or is added to the system manually).
- 2 **The system instantly texts the customer a greeting from Tyler** — Tyler doesn't have to do anything, it just fires.
- 3 Tyler gets an SMS alert immediately with the customer's name, number, and what they need.
- 4 The lead is saved to Firestore (EGC's database) and appears in the Employee Portal under the Leads tab.
- 5 The clock starts. Call the lead as fast as possible — speed wins, and the customer has already been promised a call.

INSTANT GREETING SMS (NEW)

Within seconds of the lead hitting the system, the customer receives one of two texts from the EGC number:

Between 8 AM–9 PM MT: "Hey! This is Tyler from Easy Garage Cleaning — I'll give you a call in just a couple minutes! 🙌"

Outside calling hours: "Hey! This is Tyler from Easy Garage Cleaning — we're outside calling hours right now, but I'll give you a call first thing tomorrow morning! 🙌"

FOLLOW THROUGH ON THE PROMISE

The customer was just told Tyler is calling in "a couple minutes" (or "first thing tomorrow morning"). Honor that. If you can't call within 2 minutes during business hours, you've already broken the first impression. First thing tomorrow = before 9 AM.

SECTION 2

Tyler's Full Workflow

Step-by-step

- 1 Get the alert.** Tyler receives an SMS with the lead's name, number, and what they want.
- 2 Call or text the lead from Quo.** Open Quo, find the contact (or start a new conversation with their number), and reach out. Always use the EGC number — never your personal phone.
- 3 Qualify and quote.** Ask about the job, do a site visit if needed, give a price.
- 4 Update the portal.** Open the Employee Portal → Leads tab → find the lead → use the big buttons to update status. See Section 3.
- 5 Do the job.** Show up, get it done.
- 6 Mark complete.** In the portal, open the job and click Mark Complete. A review request SMS goes to the customer automatically 24 hours later.

The Three Big Buttons

When Tyler opens any lead in the Employee Portal, he sees three large buttons at the top:

BUTTON	WHEN TO PRESS IT	WHAT IT DOES
 BOOKED	Customer confirmed the job — date set, deposit taken (if applicable)	Sets status to Booked. Stops all follow-up automation permanently for this lead.
 LOST	Customer said no, went with someone else, or stopped responding after multiple attempts	Sets status to Lost. Stops all automation. Asks for a quick loss reason (optional).
 PAUSE AUTO	Tyler is actively in conversation with this lead and doesn't want automated messages firing	Sets conversationActive = true. Pauses automation for this lead. Changes to ► RESUME AUTO when active.

KEY RULE

Every lead should end up as BOOKED or LOST. Leads that just sit there with no update are wasted opportunities and create noise in the system.

Meta Conversion Signals — Click One on Every Lead

Below the BOOKED / LOST / PAUSE buttons in the lead drawer are four signal buttons that match Facebook's standard lead-stage values. These feed data back to Meta so the ad algorithm learns what good leads look like and finds more of them. **Tyler should click one of these on EVERY lead** — it's how the ads get smarter and cheaper over time.

 **QUALIFIED**

Real lead, worth pursuing

 **CONVERTED**

Booked & paid

 **NOT INTERESTED**

Real person, said no

 **ARCHIVED**

Junk / spam / unreachable

BUTTON

WHEN TO CLICK IT

 **QUALIFIED**

The lead is real and worth pursuing — right area, reasonable budget, real job — even if they haven't booked yet.

 **CONVERTED**

Lead actually booked and paid (or scheduled a paid job). This is the strongest signal — Meta uses it to find more leads like this one.

 **NOT INTERESTED**

You reached the customer, the lead was real, but they said no, went with someone else, or aren't ready right now.

 **ARCHIVED**

Junk lead — spam, fake info, wrong service area, totally unreachable after multiple attempts, or any reason this lead can't progress.

WHY THIS MATTERS

Every signal you send teaches Facebook's algorithm. Skip this and the ads stay dumb — they keep finding tire-kickers because they have no idea what a good EGC lead looks like. Click one on every lead and watch cost-per-lead drop over the following weeks.

NOT INTERESTED VS ARCHIVED

NOT INTERESTED = you got through, they're a real person, they declined. *ARCHIVED* = the lead was junk from the start (wrong number, fake info, totally unreachable). The difference matters — Meta treats "real-person-said-no" very differently from "this was never a real lead."

SECTION 5

Pausing and Resuming Automation

When Tyler starts working a lead, he can pause the automation so the system doesn't fire any messages while he's in an active conversation.

When to pause

- You've called the lead and are waiting for them to call back
- You've sent a text and are in an active back-and-forth
- Any time you don't want the system sending automated messages to this lead

How to pause

- 1 Open the Employee Portal → Leads tab
- 2 Find the lead and tap/click to open their detail drawer
- 3 Tap  **PAUSE AUTO** — it turns into  **RESUME AUTO**

When automation resumes automatically

When a call ends on the EGC Quo number, the system automatically resumes automation for that lead. Tyler can also tap  **RESUME AUTO** manually at any time.

NOTE

When Tyler sends a text to a lead via Quo, the system automatically pauses automation for that lead. So just texting from Quo is usually enough — no need to manually hit Pause unless Tyler is working the lead in a way the system can't detect (like calling from his personal phone).

SECTION 6

Scheduling & Recurring Appointments

Jobs are scheduled in the Schedule tab of the Employee Portal. When creating a new job, there's a **Repeat** dropdown with these options:

- **One-time** — default; single job, no repeat
- **Weekly** — every 7 days
- **Every 2 Weeks** — biweekly
- **Monthly** — auto-generates 6 future instances on the calendar

- **Quarterly** — every 3 months

Recurring jobs show a  icon on the calendar so they're easy to spot.

USE THIS FOR ONGOING ACCOUNTS

Monthly garage cleanouts for property managers, biweekly storage facility sweeps, quarterly HOA jobs — any account that repeats on a schedule should be set up as a recurring appointment. Set it once and the calendar fills itself.

SECTION 7

Marking Jobs Complete & Review Requests

This is one of the most important things Tyler does. Every completed job needs to be marked in the portal.

- 1 Job is done. Tyler opens the Employee Portal.
- 2 Go to the Jobs tab or the calendar view.
- 3 Find the job and click **"Mark Complete."**
- 4 Done. The system handles everything else.

What happens automatically after Mark Complete:

- The job status updates to Completed in Firestore.
- The system waits exactly 24 hours.
- The customer receives this SMS from the EGC number:

"Hi [FirstName], thanks for using EGC garage cleaning! Would you mind leaving us a quick Google review? It really helps our small business: [Google Review Link] — Tyler & the EGC team"

DON'T SKIP THIS.

Reviews are EGC's #1 source of organic leads. Every job that isn't marked complete = a review request that never goes out. It takes 5 seconds and it compounds over time.

Opt-Outs — What to Do

If a customer texts any of these words, they are immediately removed from all automated messages and Tyler gets an alert:

STOP

stop

UNSUBSCRIBE

CANCEL

QUIT

END

Any capitalization works. The system is case-insensitive.

Tyler receives: "[Customer] opted out. DO NOT CONTACT."

✗ Do not contact opted-out customers

Once someone opts out, do not text or call them via EGC channels. The system blocks automated messages automatically. Tyler is responsible for not contacting them manually either. This is a legal requirement (TCPA).

The 4 Golden Rules

1. Always work leads from Quo — never your personal phone.

The system can't track personal phone calls or texts. The lead stays in an unknown state and things break. Every customer interaction should come from the EGC number (970) 999-1818 via Quo.

2. Always mark leads BOOKED or LOST when resolved.

Open the portal, find the lead, hit the button. Takes 10 seconds. If you don't do this, the lead just sits there forever — it's noise that makes the system harder to manage and wastes everyone's time.

3. Always click Mark Complete after every job.

Every job that gets marked complete generates a review request automatically. Every review helps EGC rank higher on Google. Higher ranking = more leads = more jobs for Tyler. It compounds.

4. Always click a Meta signal on every lead (QUALIFIED / CONVERTED / NOT INTERESTED / ARCHIVED).

Every signal teaches the Facebook ad algorithm. Skip it and the ads stay dumb — they keep finding tire-kickers.

Pick the right bucket: *Qualified* = real and pursuing, *Converted* = booked & paid, *Not Interested* = real person said no, *Archived* = junk lead.

SECTION 10

Quick Reference

SITUATION	TYLER DOES	SYSTEM DOES
New lead arrives	Call or text via Quo ASAP	Sends Tyler an alert SMS
Working a lead actively	Tap  Pause Auto in portal (optional — Quo texts auto-pause)	Holds all automated messages
Lead says yes	Tap  BOOKED in portal	Stops all automation for that lead
Lead says no / ghosts	Tap  LOST in portal	Stops all automation for that lead
After every lead interaction	Tap  QUALIFIED,  CONVERTED,  NOT INTERESTED, or  ARCHIVED	Sends signal to Meta to train the ad algorithm
Setting up a recurring job	Schedule tab → New Job → Repeat dropdown	Auto-generates future instances on calendar
Job is finished	Click Mark Complete in portal	Sends review request SMS 24h later
Customer texts STOP	Do not contact them	Blocks them, alerts Tyler
Customer asks about price	Give quote via Quo	Nothing — Tyler handles it

SECTION 11

Active Automations (Background)

These run automatically — Tyler doesn't need to manage them.

WHAT IT DOES	WHEN IT RUNS
Notifies Tyler of new Facebook leads	Instantly when a lead submits the ad form
Notifies Tyler when a customer texts in	Instantly on every inbound SMS
Tracks when outbound texts are delivered	After every text Tyler sends via Quo
Handles opt-outs (STOP, UNSUBSCRIBE, etc.)	Instantly when a customer texts an opt-out word
Sends Google review request SMS	24 hours after Tyler clicks Mark Complete
Sends booking confirmation SMS	When a booking is confirmed
Sends instant greeting SMS to new leads	The moment a lead submits the FB ad form (8AM–9PM vs after-hours messaging)
Sends conversion signal to Meta (Facebook ads)	When Tyler clicks 👍 QUALIFIED, 💰 CONVERTED, 🚫 NOT INTERESTED, or 🗑️ ARCHIVED on a lead

THAT'S IT.

The system is intentionally simple. Tyler calls leads, updates status in the portal, marks jobs complete. Everything else runs automatically in the background. No text commands, no complex sequences, no memorizing Zap numbers.
